

## HYBRID™ UNIVERSAL INTERFACE

### A FUSION OF COMFORT AND INNOVATION

The Hybrid™ is a unique fusion of technologies, designed to be a universal interface for patients, clinicians and providers. This one product serves as a nasal interface, an oral interface, and a combination of the two. The Hybrid interface is for use with positive pressure ventilation devices for the treatment of respiratory insufficiencies and obstructive sleep apnea. The unique design of the Hybrid promotes patient comfort by eliminating pressure points on the forehead and across the bridge of the nose. A built-in chin flap gently supports the chin ensuring optimal performance. The Hybrid complete system contains all of the components required to properly size the patient, eliminating the hassle of opening multiple packages to get the right fit. Sold individually.
